DETAILED ACTION

This office action is responsive to amendment filed on 06/19/2006.

Response to Amendment

The examiner has acknowledged the amended claim 15 and the amended specification.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1 and 15 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The claimed invention as a whole does not accomplish a practical application. That is, it must produce a "useful, concrete and tangible result". In this case, claims 1 and 15 are directed to an "abstract idea" because they do not represent a practical application of the idea. Such claims are lacking **"tangible results"** because assigning a state value to a node is not a tangible result. Therefore, claims 1 and 15 are non-statutory.

Claim 15 is also rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Regarding claim 15, "a computer program for starting a node in a cluster computer system embodied in a **computer readable medium**" is not limited to

Art Unit: 2157

embodiments, which fall within a statutory category. Applicant is suggested to delete “ tangible “ before computer (line 2), and insert --- storage --- after readable (line 2) in order to make the claim statutory.

Claims 2 – 14 and 16 – 22 are necessarily rejected as being dependent upon the rejection of claims 1 and 15.
